Driver for Acer Windows 7 DAWN UB4700 (U4700) One day i received a quick survey from Guru Software, and i was asked to download and install that program and it came with a free upgrade to my Norton so i did, but when i go to a game to play i have to do all this stuff about drivers, and i have no choice what games i can play. How to install the driver for u4700? Some of the drivers are a bit lengthy and the pages are a bit difficult to navigate. I found it took a while to search for the right driver for my graphics card and my wireless card. Downloads For the driver to work it must be compatible with your version of Windows, so if you are running windows 7, then you will need to download the Vista driver. Next, download the latest device manager. There are two different versions of the device manager software. Download UB4700 U5700 UB4600 U4600 The Acer driver will not work on Vista, but the Acer driver will work on windows 7 and above. Once downloaded, double-click the downloaded file and follow the instructions to install the driver. The install should not take more than 5 minutes, assuming you already have your computer on. Once the driver is installed, the computer should automatically restart, then the operating system should automatically re-detect the device. Well, i tried and it did not work, and every single time i install the driver it gives me the error, " some kind of problem with the hardware of the system. Top rated answer OK, I managed to download the Acer driver and install it, but the program needed to install the drivers said it needed to restart the computer. How to download Acer
